

# **BUGSEC MANAGED CSOC**

These days cybersecurity has become a commodity. While technology claims to be more innovative, different, fully-featured, and disruptive, we understand that technology alone is not enough against sophisticated attackers. To stay ahead of hackers, we need to look at things from their point of view.

Bugsec has extensive experience in the field of offensive security. We differentiate our security services by understanding the attacker's behaviors and fitting our security services to the unique fingerprint of your business needs.

# SERVICE DESCRIPTION

Bugsec provides 24x7x365 SOC-as-a-Service with end-to-end security capabilities in a single managed solution, including continuously monitoring your network, cloud, applications, and endpoints for threats. Our CSOC (Cyber Security Operation Center) service includes high-end technology, threat detection capabilities, skilled analysts, and an incident response team (IRT) — all in a single pane of glass.

## WHAT WE COVER

- Saas Office 365, G Suite, Okta, and more.
- Cloud IaaS AWS, Azure, GCP
- On-Premise Networks, Endpoints, and Existing Security

## SERVICE ARCHITECTURE

## **SERVICE CONTENT**

### **Enhanced Detection Capabilities**

Unify visibility across network, endpoints, applications, and cloud. Our expert security analysts search deep for hidden threats in your infrastructure through quality assurance, tuning, and proactive threat hunting.

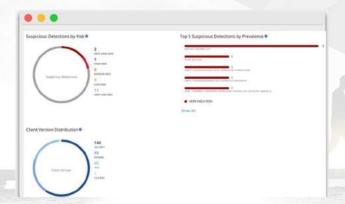

### **Improve Security Cost-Efficiency**

Maximize ROI on existing security investments through a combination of automation, knowledge management, strategies, and innovation.

## **Powerful Threat Intelligence**

Gain up-to-the-minute threat intelligence Using the latest tools, techniques, and multiple feeds to secure your network against the latest threats and vulnerabilities.

#### **Incident Response at Your Service**

Bugsec security experts will learn your network to minimize false positives and bring you actionable information, remediation steps, and responses to your organization's threats and vulnerabilities.

## **FEATURES**

24x7x365 Security Monitoring and Detection	$\odot$
Advanced Detection Strategies, Including playbooks, Use Cases, Attack simulation, Methodologies, And Process Automation.	<b>⊘</b>
Real-time Log correlation and analysis, minimizing false positives of security events.	<b>⊘</b>
Proactive discovery of suspicious activity (Threat hunting)	$\odot$
Customer predefined and custom dashboards	$\odot$
Cutting-edge Threat Intelligence to prepare and protect against cyber threats in advance.	<b>⊘</b>
Public Clouds Continuous Security Monitoring (Azure, AWS, GCP)	$\odot$
24X7 Incident Response Team (IRT)	$\odot$
Comprehensive Reports for security, management, and compliance	<b>⊘</b>
On-boarding and deployment quick process provide immediate cyber protection	$\odot$

# **BUGSEC SOC AS A SERVICE UNIQUNESS**

#### **HUMAN CAPITAL**

- Qualified senior cyber security analysts
- fulltime job workforce
- No students or part time employees

#### **OPERATIONAL CONCEPT**

- No tier levels experts only.
- Procedures and playbooks
- Up to date MITRE ATT&CK™ TTPs

#### **TECHNOLOGY**

High End technologies and tools with focus on detection and automation

#### **ONE STOP SHOP**

BugSec Complementary services: Blue Team Red Team Research incident response Forensics
